

Fiscal Year 2010
Military Construction and Veterans Affairs

Project Name	Purpose	Intended Recipient	Location	Amount Requested by Organization	Justification
Armed Forces Reserve Center and Field Maintenance Shop	to provide for the design of a new 450 member training facility	Iowa Army National Guard	Davenport, Iowa	\$2.65 million	A new facility is needed for the Army National Guard to adequately train our reserve forces. The current facilities do not meet existing criteria and unit mission requirements.
Security Forces Facility Addition/Alteration	to provide for a new security policy facility for the 132nd	Iowa Air National Guard	Sioux City, Iowa	\$1.75 million	The current facility is too small for the Security Forces Mission. Security Forces Squadron is currently storing equipment in Conex Boxes and other locations. If not provided, operations will be inefficient and operating costs will be higher because of monthly storage rentals. The training is also adversely impacted and security operations will continue to be fragmented.
Security Forces Facility Addition/Alteration	to provide for a new facility for the security forces of the 185th and those who man the the wing of 18 PAA F-16 aircraft	Iowa Air National Guard	Des Moines, Iowa	\$4.6 million	The current security police facility is grossly undersized and poorly configured for the increase in manning. There is insufficient space to store the mobility equipment, thus some of the equipment and materials are stored outside. With the increased threat condition due to Operation Noble Eagle, base security is of highest importance. If not provided, the primary mission would continue to be threatened. Aside from the inefficiencies and lack of space, time, fuel and other resources would continue to be wasted transporting people to and from the arms range.

Projects requested by Iowans were forwarded to the Committee on Appropriations on May 1, 2009.
